Summary of Qualifications

Windows systems administrator with four years of experience in VMWare, Windows Server, and Active Directory. Experienced with host provisioning, scripting, and environment management including hybrid domains with Windows and non-Windows environments. Excellent problem solving and communication skills.

Experience

University of Minnesota Computer Science Department, Minneapolis, MN

System Administrator (January 2010 - Present)

- Rebuilt two Active Directory domains from scratch and integrated with System Center Configuration Manager.
- Integrated four departments totalling over 500 computers into UMNAD.
- Integrated departments with Unix infrastructure including NIS and LDAP into UMNAD
- Used Quest Authentication Services to authenticate Unix and Unix-like systems against UMNAD.
- Managed 5 VMware hosts in 2 clusters with over 100 guests.
- Installed, managed, and updated Windows Server 2003 – 2012R2.
- Installed, managed, and updated Windows XP and 7 using SCCM 2007 and SCCM 2012.
- Designed, updated, and maintained OSD Task Sequences.
- Provided critical evaluation and input for major projects during planning and evaluation phases.
- Used scripts to manage and automate tasks including account management, virtual machine provisioning, and backups.

Student System Administrator (September 2007 - January 2009)

- Provided tier one support for faculty, staff, and students for accounts, files, computers and software.
- Managed and directed other student workers after a year of experience.
- Routed and escalated tickets in a ticketing system to the appropriate technical contacts.
- Assisted full time staff with tasks covering the full range of operations.
